

The President's RULE

By Shambhulingappa

Prologue PENDING!

Chapter 1: The Broken Compass

The ochre stone walls of Vidhana Soudha had witnessed many storms, but that summer of 2026 felt like a deadly fever. In the last eight months, this was the third time that the coalition government had literally evaporated.

This chaos in Bengaluru had given a strong weapon to the power center in New Delhi. The Prime Minister announced the "One Nation, One Election" policy for Karnataka and immediately enacted presidential rule.

By midnight, defying everyone's expectations, the central government announced the name of Sampath Kumar, a renowned oncologist from Jharkhand, to seize control of Karnataka's administration. The media scrambled to dig into the background of this "unknown" individual.

Thousands of miles away in Ranchi, Sampath Kumar was shocked as he watched the announcement on TV. Suddenly, black SUVs pulled up outside his house, and officers began banging on the door.

Seeing the group of officers through the window, Sampath turned to his wife Priyadarshi, realizing the gravity of the situation. This time, there was no plea in his voice, but rather a stern command that a doctor would give in an emergency.

Sampath said in a serious tone, "Priya, look at the news... they have crossed all limits! They announced my name. But remember, we are not going to be a part of this race!"

From outside, the officers shouted, "Doctor Sahab, please open the door! We have come from Delhi... this is an order from the Prime Minister's office!"

Ignoring the commotion outside, Sampath locked eyes with Priyadarshi and ordered, "Priya, turn off your phone and take the kids inside the room! Under no circumstances should the door be opened. Tell them we have nothing to discuss. We are not sacrificial goats that they can drag into politics whenever they want! Get inside now!"

Seeing the firmness in his voice, Priyadarshi silently moved to the inner room. The pressure from the officers outside intensified, but the silence of military discipline enveloped the home.

The game of fate had only just begun.

In Between Scenes

They have retirement plans in the next 5 years. They will be having a normal dinner at home like normal days.

Chapter 2: The Delhi Gambit

The personal jet that stood on the runway of Ranchi Airport was not just an aircraft; it was a symbol of the central government's stubbornness. Without any official summons, arrangements were made to bring Sampath Kumar and his family to the Rashtrapati Bhavan under the pretext of a 'request.'

Inside the plane, Sampath looked at his family and said firmly, "Remember, we can only say 'No' there. Let's all say the same thing—this is not acceptable to us." Priyadarshi and the kids nodded like a professional team. Sampath Kumar's voice of refusal was about to echo against the walls of Delhi.

In the grand hall of the Rashtrapati Bhavan, the atmosphere was mysterious. As anticipated, the conversation began, but the Home Minister played the strategist. He seated Sampath in one corner and took Priyadarshi and the children to another room.

There, the Home Minister spoke not as a politician, but as an elder. "Priyadarshi ji, this country is changing, but it needs an honest person at the helm. Just 90 days... we need only 90 days of your husband. Whatever he lost in the past, we will return it all to him with respect. You can rest assured, nothing will happen to him. We guarantee 1000% that his and your family's safety is our responsibility."

The assurance and sense of security in the Home Minister's eyes changed Priyadarshi's mind.

An hour later, when Sampath Kumar came out, the expressions of his family had changed. Seeing Priyadarshi smiling in agreement, Sampath was literally taken aback.

On the way back home, Sampath, filled with rage and confusion, asked, "Priya! What is this? How did you agree? What happened to our discussion, and what did you do? What did he say to you that made you agree?"

Priyadarshi calmly replied, "He said he would close your old court case, Sampath. You have been troubled by it for years."

Sampath shouted, "I don't want their charity! I will win that case on my own merit. I don't need their support!"

Then Priyadarshi came closer, gently placing her hands on his knees, looking into his eyes, and said, "Sampath, I asked for what you've always wanted... not just the case but your respect that was lost after that incident. You will be fine; I know it. You take care of this responsibility; I believe you can do it."

Sampath was left speechless. Faced with the trust and love in his wife's eyes, an honest doctor agreed to perform the biggest 'surgery' of his life—the political surgery of the state of Karnataka.

Chapter 3: Language, Speech, and a Bad Punchline

The atmosphere in the Press Club of Bengaluru was suffocating. For the first time in Karnataka's political history, a doctor from Jharkhand was set to seize control of the state under the 'Governor' administration. The camera flashes blinded Sampath Kumar as he sat before the media.

Clearing his throat, Sampath began speaking in Hindi, aware that language could spark a fire here. But in his anxiety, his 'sense of humor' fell a bit flat.

A journalist grabbed the mic and asked directly, "Sir, you've come to Karnataka. Do you know at least one word in Kannada to understand the local dialect?"

Sampath chuckled and replied in Hindi, "See, to tell the truth, until a few minutes ago I thought this was 'Kannad.' But here, a gentleman corrected me that it is 'Kannada.'"

A slight laugh and murmurs spread through the crowd. Sampath continued, "Now I don't want to get into a debate about whether Hindi is your grandmother or a South Indian language! I leave all that to my bureaucrats. What I can do here, I will focus on that."

His "grandmother-mother" joke didn't hit home. Some present exchanged looks as if asking, "Is he joking or being serious?"

Sampath adjusted the mic and firmly stated, "I can fluently talk in Hindi and English. If that fails, I will make every effort to learn Kannada. If I need a translator, I can get one, but work will not stop."

As other journalists raised their hands for further questions, Sampath waved them off. His face now bore seriousness.

"You will get answers to all your questions. But right after two days, I will hold another press meet. That day, I will come with the three biggest issues of Karnataka and their solutions. Until then, just give me 48 hours."

Sampath Kumar stood up. Curiosity enveloped the Vidhana Soudha about what he would dig into during those 48 hours—whether he would sift through the state's files or disturb the sleep of corrupt politicians.

Chapter 4: The Digital Backlash

The "grandmother-mother" joke Sampath Kumar made in his first press conference had literally backfired. By the next morning, waves of outrage erupted on social media across Karnataka.

#GoBackSampath and #AntiKannadaSampath hashtags started trending number one on X (Twitter). News channels exaggeratedly screamed, "What does Sampath know about Kannada; is it a joke?"

Sampath realized that the media was a powerful 'Diluting Machine'; no matter how good the content, it could be poisoned with one wrong word.

Inside, Sampath felt anguish over his ignorance. Immediately, he posted on X: "I withdraw my joke. The outrage expressed by the Kannadigas over my ignorance and their sentiments is justified. I accept this constructively."

But the people wouldn't let it go. A cocky user mockingly replied—"No need, sir; just remain silent in Kannada, that's the greatest respect you can give us!"

Reading this, Sampath realized one thing: people now wanted sensational topics to discuss rather than solutions. When emotions flare, wise words don't resonate with anyone.

Half an hour later, Sampath posted again. It calmed the entire state. It contained just two words: "Learning, sorry!"

Inside, a colleague from Jharkhand chuckled, "Sampath, learning Kannada isn't that easy. The book 'Learn Kannada in 90 Days' is just a tagline. It's a complex language."

Sampath replied seriously, "Nothing is impossible. If I want love from the people here, I must first show respect for their language."

Without delay, Sampath personally hired a Kannada tutor. He paid out of his pocket without using government funds and began classes that very night. More than letters, he aimed to understand emotions.

Now, Sampath Kumar was fully awakened. Determined to steer clear of unnecessary controversies, he focused solely on three topics. The 48-hour grace period was running out. At the next press meet, he wouldn't speak about language; instead, he would address the 'three formulas' that would shake the state's administration.

Sampath wrote in his diary: "Let words be fewer, and let work speak."

Chapter 5: The Triple Agenda

The press conference hall was filled not only with media personnel but also with senior bureaucrats. Sampath Kumar calmly watched what was being broadcast on the large screen. This time he wasn't there to give a speech; instead, he came to present a work report.

He had already posted everything on notice boards and was ready to announce it in full-page advertisements in the next day's newspapers. His reasoning was simple: "Instead of listening to

YouTubers, let the people go through the newspapers and understand. Knowledge that comes without effort holds no value."

Sampath grabbed the mic and got straight to the point. This time, his voice carried authority.

Agenda 1: End of Freebies

"I have abolished all freebies in the first week itself," he announced, causing the entire hall to fall silent. "I've heard news that some have attempted suicide because of it. But hear the truth—what they are attempting is not because of poverty but rather because they can't break free from the habit or 'addiction' of getting things for free."

He pointed to the screen, "It takes a second to announce a freebie, but it turns an entire generation into lazy individuals. Our goal is self-reliance and economic stability. Karnataka needs hands that work, not hands that beg for alms."

Agenda 2: Crime-Free State

"The second agenda is—crime-free Karnataka. You might think I can achieve this by the 75th day. But no," Sampath said, narrowing his eyes. "We can do this in one day. Law enforcement happens in the mind, not just on paper. From today onwards, the message goes out that there is no place for criminals in this state. We will celebrate the results on the 75th day."

Agenda 3: Elimination of Corruption

"Finally, the same worn-out phrase—elimination of corruption. I know this isn't a 90-day task. But within the next two months, I will shake the roots of this system."

He turned to the bureaucrats, "Officials are already supporting my decisions. Because they know this time there will be no political pressure from above. Ending corruption doesn't require grand speeches; only the signature of an honest person will suffice."

When Sampath Kumar finished speaking, a serious silence enveloped the hall, more than applause. This was not a politician's speech; it was like a surgeon's explanation before he removes a tumor from his patient's body.

The people on the streets of Bengaluru awaited the next day's newspaper. More than the YouTube notifications, that day the bold letters would write the future of the state.

Chapter 6: The Agony of the Incision

The air around Vidhana Soudha was toxic. Sampath Kumar's three agendas were not merely reforms; they were strikes that hit at the very veins of the system. Opposition parties united and took to the streets. This was not just a theoretical battle; it was a blow to their 'black money' empires. Hundreds of crores saved for elections, litigation fees, and the paper values of real estate collapsed in an instant.

The media descended like hungry vultures. News channels blared titles like "Modern Tughlaq," "High Drama," and "Anti-Kannada" as #GetOutSampath spread like wildfire. Most alarmingly, despair caused by the removal of freebies led to news of 60 suicides, shaking the state to its core.

Heavy pressure came from the central government and the Governor's office to rescind these tough decisions. But Sampath Kumar remained steadfast.

When officials gathered in the Raj Bhavan, anxiety was visible on their faces. "Sir, this situation is spiraling out of control. 60 lives are lost. Shouldn't we at least restart some free schemes?" asked a senior officer.

Calmly observing the sea of protesters outside, Sampath replied, "This is the pain of surgery. When you remove a cancerous tumor, there will be blood and pain. Leaving that tumor halfway would kill the entire body. These 60 people did not die of hunger; they were betrayed by an excessive dependence that the system taught them. Breaking that dependence is not cruelty; it's the way to save the next generation."

He then turned to his team and announced a tough decision. "From today, my office will be distant from the media. The media is working against our purpose. We don't need publicity; we need results. They are machines that distract; we need to be machines that provide solutions."

Sampath began secret operations to find alternative ways to improve the lives of the poor and distressed. He was not simply abolishing plans but launching 'Remediation and Compensation' schemes.

Instead of cash alms: Promises of employment in small industries for those who were receiving free rice.

Direct investment in education: Redirecting funds from freebies to improve the quality of government schools to international standards.

Health insurance: Instead of providing free mobile phones, arrangements were made for every poor person to receive better medical treatment.

Media cameras awaited outside Vidhana Soudha. But Sampath Kumar exited from the back gate, directly going to the villages to witness and address the struggles of the people. He left behind the media's 'drama' and silently continued the state's 'surgery.'

A week of silence created a new type of curiosity throughout the state. A government that made little noise was writing a revolution.

Chapter 7: The Toll of Transformation

Sampath Kumar sat before the radio mic. He had no script, only the words of his heart. The people of Karnataka held their breath, listening.

Sampath Kumar's speech (In Hindi):

"Dear brothers and sisters of Karnataka," Sampath's voice was serious.

"Today, I'm not speaking as an administrator, but as a human and as a doctor. In the last few days, 66 people have lost their lives... I can feel this pain. This is not just a dark day for Karnataka, but the darkest day in the entire history of the world."

"But today I want to say this—these deaths did not happen due to hunger. These deaths happened due to that 'freebie' habit that we have been instilling for decades. Free rice, free money... all of these have weakened our poor and youth from within. We have made them so helpless mentally that instead of fighting for their rights, they have learned to beg before the government."

"I don't want to see you as beggars! I want every poor person in Karnataka to be empowered enough to ask for their 'right', not beg for 'alms'. I have started a fund-raising initiative—those who trust me in this tough decision, they can participate in this. Not a single rupee of government money will be used here."

"This is surgery, and surgery is painful. But if today we do not remove this cancer, this country will never be able to stand on its own. I am firm on my decision."

When Sampath finished speaking, silence enveloped the radio studio. But his words of bitter truth stirred the hearts of people across Karnataka. The next morning, the youth took to the streets not to protest but to contribute whatever they could to that "public fund."

Chapter 8: The Ethical Anchor

Emotions ran high in the hall. Sampath Kumar was not just on the stage; he sat among those 66 families like a son, like an elder brother. His next move shocked the entire nation.

Holding the mic, Sampath spoke gravely:

"Look, I am a doctor. I have seen a lot in my life. If these harsh regulations I have implemented cause financial hardships for your family or if you feel you still need assistance, I, Sampath Kumar, personally take on the full financial responsibility for those 66 families. My savings, my assets will all be reserved for the education and livelihood of your children. Not a single penny of government money will be touched for this."

A moment of silence fell over the hall. An administrator putting his own gains aside for the suffering of the people was a rarity in Indian politics.

Final Warning Against Corruption

Holding the hands of those families, Sampath looked into their eyes and pleaded, "Give me one promise... after I leave this position tomorrow, if any politician comes to you offering money to attend a rally or vote, do not accept it. Do not sell the sacrifice of your family for that 'bribe.' They will turn you back into political sacrifices."

"Do not succumb to political agendas. That 500 or 1000 rupees bribe you receive will cost you your children's future. Stand strong. Preserve your dignity."

The Changing Youth and Support from Entrepreneurs

Seeing Sampath's ethical stance, the business world of Bengaluru was taken aback. Seeing Sampath take on the responsibility of those 66 families, many IT company owners stepped forward, declaring, "Sir, why should you bear it alone? We will take on the responsibility of the education and employment of those families' children under our CSR."

The youth took to the streets shouting—"Salam Sampath!"

Mainstream media had to change their stance after witnessing these scenes. Those who had portrayed Sampath as a 'cruel' figure began producing special reports on his 'ethical commitment'. Alternative media labeled Sampath's actions as the "New India Model."

Sampath was no longer just a transit administrator; he had emerged as a 'woke leader' awakening the soul of the state. Only 10 days remained until the expiration of the 90-day deadline. The time for the final surgery was approaching.

Chapter 9: The High-Octane Friday

Sampath Kumar's rule reached its 20th day. The opinions of the entire state had now split into two camps: one of the ideological opponents, the other the youth who had surrendered to Sampath's ethics. But behind the scenes, Sampath's selected bureaucratic team had been quietly preparing a massive plan for the last fifteen days. After abolishing the freebies, the question was how to utilize the thousands of crores saved and dismantle the web of 'black money' cheating the state.

Friday afternoon at 3:00 PM. In the highly confidential conference room of Vidhana Soudha.

Chapter 9: The High-Octane Friday

Sampath Kumar's rule reached its 20th day. The opinions of the entire state had now split into two camps: one of ideological opponents, the other the youth who had surrendered to Sampath's ethics. But behind the scenes, Sampath's selected bureaucratic team had been quietly preparing a massive plan for the last fifteen days. After abolishing the freebies, the question was how to utilize the thousands of crores saved and dismantle the web of 'black money' cheating the state.

Friday afternoon at 3:00 PM. In the highly confidential conference room of Vidhana Soudha.

The bureaucratic team had prepared their final presentation. The plan was simple yet terrifying: complete digital transparency.

From now on, there would be no cash transactions in the state.

Real estate transactions would be adjusted to international standards for 'market value.' This would make it impossible to hide money illegally.

This one decision would blow away the black money market, tripling the government's tax revenue overnight.

120 Minutes of War

As soon as this plan was presented, 70% of the officials in the room were stunned. A senior officer raised his voice, "Sir, this is a huge explosion! We need to consult with Delhi. The opposition will not let us live. This could lead to legal battles!"

Sampath Kumar looked at his watch. A strange calmness was on his face. He turned to the team and asked just one question: "What is the impact of this? How significant is this compared to demonetization?"

The team leader replied, "Sir, the impact on the general public will be only 5%. But the effect on the rich with illegally hidden money and corrupt politicians will be 100%. Their black money papers will turn into mere scraps of paper."

Sampath Kumar looked out the window and said, "When a strong argument is in front of us, we must help the country. It's 3 PM now... I have only 120 minutes. By 5 PM, I need to pick up my children from school. So stop the nonsense and execute this! Start it now!"

Master Stroke

In the next two hours, there was a whirlwind inside Vidhana Soudha. Servers were updated, gadget notifications received digital signatures. By the time the banks closed on Friday evening, the economic landscape of the state had changed forever.

As former corrupt politicians were preparing for their weekend parties, they received this 'weekend gift.' The papers that held black money in their lockers had turned into pieces of paper. The common people faced no trouble, but the empires that looted the system crumbled.

Exactly at 5:00 PM, Sampath Kumar stopped his car in front of the school gate. Without the trappings of power, he welcomed his children home as an ordinary father. But the whole state knew—on this 30th day, Karnataka did not find an administrator, but a 'superhero.'

Chapter 10: The Midnight Incision

That 'digital surgery' of Friday had disturbed the sleep of three former Chief Ministers. Their black money, invested in real estate, had turned into mere scraps of paper. They could not comprehend the game of this “Jharkhand doctor.” Their only calculation was simple: “If he is working this hard, then the amount he is expecting at the end of these 90 days must be huge.”

At 10:30 PM. Without any warning, the three former CMs arrived in their black SUVs in front of Sampath Kumar's private residence. These political giants, mixed with arrogance and greed, descended upon the home of a doctor.

Sampath opened the door and stepped out, his face devoid of any welcoming demeanor.

“I don’t like uninvited guests,” he said harshly. Priyadarshi understood the situation and immediately called the children inside. Sampath's eyes were fiery. “You decide the place; I will reach there in 20 minutes. I don’t like discussing things at home.”

Chilly Night and Bags of Money

In a secluded private garden on the outskirts of the city, the chill made Sampath shiver. Dressed in overcoats, the former CMs were ready. Sampath arrived in his simple cotton shirt. One of the former CMs laughed and placed ten large bags on the table. Inside were stacks of money. Along with it were several papers of illegal property.

“Doctor Sahab, this is our small gift for your hard work over these 90 days. Just loosen up your decisions a bit,” they tempted.

Sampath picked up a bundle of 500 rupee notes from the bag. A strange smile appeared on his face.

“Do you know how much 90% of the people in India earn every day? What is their annual income?” he asked while showing the bundle. “What’s in my hand is 5 lakh... this is a common man's entire year’s earnings. You are putting a price on one of my decisions?”

Sampath continued sarcastically, “I didn’t know one decision could be worth so much! I think I should start a course on Unacademy — ‘How to Get Rich Overnight!’”

The three former CMs were taken aback. Was he joking or being serious? Meanwhile, Sampath seemed to feel the cold increasing. He asked for whiskey. The politicians sighed; “Finally, he has come to his senses,” they thought.

Final Warning of Surgery

The whiskey bottle arrived. But instead of drinking it, Sampath poured it over the ten bags of money. Then he took out a lighter from his pocket and set it on fire.

The flames rose in the chilly night. Hundreds of crores of rupees turned to ashes right before the eyes of the former CMs. Sampath's face appeared dreadful in the blaze. He stepped closer and said in a furious tone:

"I consider you the 'tumor' of this system. If the people believe in you, I will cut you into pieces and feed you to the street dogs, you damned!"

He issued the final warning in Kannada: "Shut up if you want, otherwise if I say I will perform surgery... there's that list of 66 people! On the other end of it are your names! Understand?"

Sampath Kumar walked away. Behind him, the black money worth crores burned to ashes. The three former CMs stood trembling, not from the cold but from fear. They realized this doctor was not just here to cure a disease; he had come to eradicate the ones who brought the disease.

Chapter 11: The Shadow Siege

After that dreadful warning to the former Chief Ministers, all political parties in Karnataka forgot their enmity and united. Their goal was singular— to tarnish the image of this 'Jharkhand doctor.' Meanwhile, Sampath received a voice note from the Prime Minister and Home Minister in Delhi: "Sampath, we are proud of your work. Keep going." But some influential leaders in the center were less than pleased with this development. Intrigues were brewing inside.

The Hacker's Assault and Kannada Humor

The security around Sampath's house was so tight that not even a rat could slip through. Hence, the opposition hired international hackers. Digital spy scripts were installed in every corner of the house. The hackers were waiting for any significant clue.

But all they got was laughter! Inside the house, Sampath and his family were not discussing state secrets but struggling to learn Kannada. The kids laughed at their father's mispronunciations. The recorded audio of the family was filled with sounds of them 'struggling' in Kannada. While this disappointed the politicians, they did find a small clue: Sampath and Priyadarshi's wedding anniversary was approaching, and the kids had exams coming up.

The I-20 Car and a Chilly Night

That night, Sampath decided to take Priyadarshi out for dinner under the pretext of their wedding anniversary. Since the kids had exams, and his mother needed a deep sleep (having taken sleeping pills), Sampath planned to take Priyadarshi out in a small I-20 car to avoid public attention.

Driving through a deserted area on the outskirts of the city, Sampath spent about 2-3 hours inside the car. However, behind them, a team with hackers and spy cameras was tracking their movement. Taking advantage of the dark, they recorded the car's movements and some objects thrown out (including condoms).

The Morning Shock: Character Assassination

The next morning, as soon as Sampath opened his eyes, the whole state was ablaze. Every news channel screamed, “The Dark Face of the Governor!”

Scene 1: Videos of the I-20 car went viral, portrayed as if it indicated some illicit relationship.

Scene 2: At precisely the same time, three unknown young women appeared before the media, claiming, “The governor deceived us; we had a relationship with him.”

Scene 3: Headlines blared, “The true colors of the doctor who preaches welfare to the poor” appeared.

In just a few hours, all the respect that Sampath Kumar had earned was buried. People stood on the streets, throwing slippers at his photos. #DirtyDoctor and #ShameOnSampath hashtags began trending.

Priyadarshi sat weeping, while Sampath Kumar stared into emptiness. The very people he had trusted to reform the state were now looking at him like he was a traitor.

“Sampath, what do we do now?” Priyadarshi asked in a shaky voice.

Sampath Kumar remained silent. On the 45th day of his 90-day rule, he had fallen into the biggest pit. Would he rise up again or succumb to this disgrace?

Chapter 12: The Feedback Form and the Ban on Alcohol

For the people of the state, it had become a major source of entertainment. In the media and social media, the "car video" had become a sensation. The opposition took this as a significant agenda, shouting, “No Entry for Public Romance in Cars! Penalties for Violators!” It had turned into a comedy show for the people.

Scene 1: Silent Humor in the Office

Sampath Kumar stepped into his office as usual. The entire staff was snickering, glancing at each other. There was curiosity about how the boss would react to the incident. But Sampath behaved as if nothing had happened.

He went directly to each desk and placed a white sheet. A brave official asked, “Sir, what’s this? A resignation letter?” Sampath nonchalantly replied, “That’s a feedback form. Rate my leadership regarding file movement last week. Fill it honestly. Place it on my table by lunchtime.”

The entire office was astonished! While everything was chaotic outside, he was focused on governance. As soon as Sampath entered his cabin, the entire office erupted in laughter.

Scene 2: The Dinner Table Dilemma

That evening, the atmosphere at Sampath's home was serious. The investigation team had come to seize the family's mobile phones under the pretext of "evidence collection."

His son shouted in anger, "Dad, what madness is this? How can we live for 45 days without a phone? What will they find on my phone? My Zomato order history?" His daughter protested, "What about my client meetings? What will the investigation team discover from my friends' chats?"

Sampath calmly replied while stirring yogurt, "It's procedure. Hand over your phones. This is better for you; you will have a digital detox." No one understood how being phone-free for 45 days would help the investigation. But the boss's word was law!

Meanwhile, breaking news came on TV. Priyadarshi released a video statement. On TV, Priyadarshi said, "Yes, I was in that car. I enjoyed every moment spent there. Don't we deserve privacy? Stop the character assassination."

His son watched in disbelief. "Dad, did she just take your side?" Sampath, without looking at the TV, said, "Pass the pickles."

Scene 3: Media U-Turn

As soon as Priyadarshi's statement was released, mainstream media began to change its narrative. Anchors were confused. "We apologize to our viewers; we got confused by the YouTubers. We don't understand the young people's sense of humor. Sorry, Sampath Kumar..." they began to apologize. Behind them, Sampath's "Triple Agenda" team continued to work quietly on their earlier decisions.

Scene 4: New Bombshell - 'No Alcohol'

After the humor and controversies faded, Sampath was ready to announce his next decision. It was tougher than all previous decisions. Sampath declared, "From now on, there will be a complete ban on alcohol in Karnataka."

Officials were taken aback. "Sir, this is impossible. What about the revenue story?" Sampath replied, "Discipline and maturity must come to the youth. If they want to drink, they can leave the state!"

However, this decision faced severe opposition from the central government. The Governor and Sampath were about to face their first significant conflict.

Chapter 13: The Delhi Call - Revised with Stats

Chapter 13: In Sampath Kumar's secret office. At 11:15 PM, an influential minister managing the central finance and home accounts, Minister Rao, appeared agitated on the video conference. Next to him, the Chief Secretary sat with his head down.

Central Minister (Rao): “Sampath, do you know how to read numbers or was that not covered in IAS training? Last year, do you know what your state’s excise revenue target was? ₹36,000 crores!”

Sampath remained silent.

Central Minister: “That’s about 21% of your state’s own tax revenue! If you ban alcohol, where will you get that 21% money? Teacher salaries, free bus schemes, road repairs... will you beg for more money at the center? Remember, if you do this, we will have to reconsider the GST share.”

Sampath: (slowly opening a file) “Sir, you are talking about ₹36,000 crores in profit. But according to the WHO report, for every ₹1 the government earns from alcohol, society loses ₹2.35. Hospital expenses, accidents, domestic violence, and loss of youth productivity. So we’re not making profit, sir; we’re falling into a debt trap.”

Central Minister: “That’s all theory, Sampath! The ground reality is different. Karnataka is number one in whiskey consumption. People have made it a habit. If you suddenly stop it, bootlegging will start. The black market mafia will target you.”

Sampath: “I’m not imposing an outright ban. This is a 'pilot project.' In the first phase, I will control 'foreign liquor' and pub culture only in Bengaluru. IT professionals should create new things instead of getting drunk on weekends. Among 140 crore people, we need Einsteins, not lazy individuals wandering around.”

Central Minister: “Cunning, Sampath. Business tycoons won’t sit idle. If these decisions drive investors away to Hyderabad, you will be the one to blame. This is your final warning!”

The screen went black. Sampath let out a long breath.

The Chief Secretary beside him asked nervously, “Sir, ₹36,000 crores... is this really a risk?”

Sampath smiled and replied, “If we make people good citizens instead of wine shop customers, they will generate more wealth than that ₹36,000 crores. Call the research team; let’s get to work.”

Chapter 14: The Break and the Bark

Scene 1: The National Problem

When Sampath Kumar received that video call from Delhi, it wasn’t just a discussion but a stern warning. The central ministers were fuming on-screen.

Central Minister: “Sampath, stop your revolutionary ideas! Alcohol ban, is this how you are attracting the whole country’s attention? We want stability, not your foolishness. Go take a break for 30 days. Go see what the real problems of the real people are. No need for these big policies.”

Sampath felt anger bubbling up. “Sir, you didn’t say that when you gave me a free hand...”

Central Minister: “Free hand doesn’t mean to cut your neck! Take a weekend break. Relax your mind. Meanwhile, I’m sending you a 'sensible' research file. Work on that.”

The call ended. Sampath, with curiosity, checked his email. The bureaucrat had sent a “sensible” file titled: “India’s National Language Policy - A Study.”

Sampath stared at the file in disbelief. People were dying on the streets of Bengaluru, and they wanted him to research language!

Scene 2: The Driver and the Dog

While driving home from the office, Sampath’s mood was foul. To break the silence, he turned to his driver, Manju.

Sampath: “Manju, in your opinion, what is the biggest problem for the people of Bengaluru? Traffic? Power cuts?”

Manju (turning the steering): “None of that, sir. It’s the dogs!”

Sampath: “Dogs?”

Manju: “Yes, sir! The other night, I parked my bike and was walking home when a black dog came and bit me on my... my...” (hesitating) “...my rear end, sir!”

Sampath couldn't help but laugh. “On your rear? So it’s like on the seat?”

Manju: “Yes, sir! I couldn’t sit for a week. I had 14 injections. The doctor even made a joke, ‘Be careful, Manju, if a dog bites you, you’ll start barking!’ I get scared when I see dogs. Now, if a dog crosses the road, I don’t hit the brakes... I just smile and press the accelerator!”

Sampath: “Oh, poor thing! That’s called ‘driving sadism.’”

Manju: “That’s not sadism, sir, it’s self-defense! The other day, a dog was given biryani in our street, and it bit the delivery boy’s leg. These dogs are out of control, sir.”

At that moment, a light bulb went off in Sampath’s mind. While the people in Delhi were fixated on “national language,” here, the common folks were running for cover to protect their backsides! This was indeed the “real problem!”

Scene 3: Operation Dog

Once he got home, Sampath deleted the "National Language" file and Googled "Street Dogs Menace in Bangalore." The statistics were shocking. Thousands of bite cases were reported every year! Children, seniors, no one was safe.

Sampath immediately assembled a peculiar team of three:

A retired veterinary doctor (animal expert).

A tech expert (for drone mapping of dog areas).

A logistics manager (to route the vans for dog catchers).

Montage Scenes:

Day 1: Sampath Kumar himself woke up at 4 AM and created a “Heat Map” identifying how many dogs were in which areas using drone cameras. Looking at the red spots on the screen, he exclaimed, “This is no less than a battleground!”

Day 2: Old government ambulances were transformed overnight into "Mobile Sterilization Units." He briefed.

Chapter 15: The Stray State

The problem of street dogs was not limited to Bangalore. According to statistics, there are over 310,000 stray dogs in Bangalore. Every year, an average of 20,000 to 30,000 dog bite cases are reported. Sampath realized that Animal Birth Control (ABC) schemes existed only on paper.

In his own style, Sampath devised a massive plan called “Operation Saramaya.”

Scene 1: Dog Reserve

Sampath made a bold decision. He declared a section of forest near Bannerghatta on the outskirts of the city as a “Dog Protected Area.” “We must not kill the dogs, but they must not roam the city streets,” was his policy.

He named this area after a mythological background: “Shunaka Loka.” Each block within it was given names of mythological dogs:

Sarama Block (the dog of the gods)

Shyama-Shabala Block (Yama’s dogs)

Bhairava Van (Shiva’s vehicle)

They planned to rescue dogs from corners of the city, vaccinate them, and relocate them to this well-organized reserve. A unique program called “Feed Street Dog” would provide food for them. People would be encouraged to visit on weekends to spend time with the dogs and adopt the ones they liked.

Scene 2: Troll Fest Across the State

From the moment Sampath Kumar announced this plan seriously, social media exploded. The

image of Sampath, whom many considered a serious politician, transformed into that of the 'Dog King.'

Meme 1: A photo of Sampath with a tongue-out effect captioned, “This is what the real stray problem looks like!”

Meme 2: “No alcohol to drink, but the Chief Minister is building resorts for dogs in Bannerghatta! Bravo, boss, bravo!”

Hashtag Campaigns: #NaayiSampath and #BowBowDictator trended nationally.

Opposition leaders mocked him: “The people of the state have no jobs, no food, but the Chief Minister is building hotels for dogs. He is not Sampath Kumar, but 'Sampath Kunni' (the dog).”

Scene 3: Media Retribution

Mainstream media, which had been attacking Sampath since the previous events, now had another field day. In the evening’s debates, the anchors ridiculed Sampath Kumar.

One anchor donned a dog mask and sat in the studio. “Today, we are not speaking in human language, but in the language that Sampath understands... Bow Bow!” he shouted.

Sampath’s silence was portrayed as his defeat. “Those who promised to transform Bangalore into Singapore have now turned it into 'Bokalu-pura' (Dog Town),” the newspapers headlined.

Scene 4: The Final Farewell

By the end of the chapter, Sampath Kumar seemed isolated. No matter how serious the change he tried to bring, people took it humorously. In their eyes, he was no longer a competent bureaucrat but had become a ridiculous figure.

On social media, people posted photos of him with flower garlands, captioning, “RIP to the Dictator’s Career.” “How low can a person sink for power? First, a liquor ban, now chasing after dogs. Next, he might present a budget for cats!”

Sampath turned off the TV. In the dark room, his face showed no emotion. But his diary held the next plan. Let them laugh; they didn’t know the lurking danger behind that laughter.

Sampath thought to himself: “I know it hurts when dogs bite, but the words of these people are more venomous than a dog bite. For now, it’s better to stay quiet.”

While the entire state paid its “final tribute” to Sampath Kumar's political career, another significant order was about to be released from the Governor’s office. The game had only just begun.

Chapter 16: The Elevator Attack

Preparations were underway for the trip to Kodagu. That evening, Sampath was coming down the elevator of his apartment with his family when, at the 4th floor, a man with a black mask suddenly entered.

As soon as he came in, he drew a gun and aimed it at Sampath. His family screamed in fear.

Masked Man: “Sir, don’t scream. I need ten minutes of your time. Let’s go inside your home. I have an important 'pitch deck' for you to see.”

Sampath realized that this man was not just an attacker but had something significant to say. However, he was wary of possible surveillance cameras in the elevator and his home.

Sampath: (calmly) “Look, entering my home right now isn’t safe. There’s spying going on in there. The whole place has been compromised.”

The man became confused, and in that moment of uncertainty, Sampath quickly grabbed the gun from his hand and pinned him against the wall.

Sampath: “Who are you? Why are you attacking me? Someone is watching my house. If you really have something to say, come to my office tomorrow morning. No one can stop us there. Now get out of here, or the guards will come!”

The man’s name was Jyestha. Seeing Sampath’s courage and awareness, he decided to trust him. He quickly disappeared from the scene.

Scene 2: The Secret Meeting

The next morning, Jyestha entered Sampath’s office, visibly anxious, without a mask on.

Sampath: “Who told you to show a gun and make a pitch deck in the elevator? Take a seat.”

Jyestha: “I know this is a huge risk, but I have information that could be vital for you... about the opposition.”

Chapter 17: Hidden Threats

Sampath's mind raced as he listened to Jyestha. There were whispers about a conspiracy unfolding within the political landscape of Karnataka, one that could undermine his leadership and his plans for reform.

Jyestha: “There are powerful people who want to see you fail. They’ve hired hackers to tarnish your image and create chaos. They will stop at nothing to bring you down.”

Sampath leaned in, intrigued. “What exactly do they plan?”

Jyestha: “They are planning a character assassination campaign. They have footage from your car incident and are preparing to twist narratives to paint you as unfit for leadership.”

Sampath felt a wave of anger but also recognized the challenge ahead. He knew he had to act swiftly and decisively to counter this threat.

Chapter 18: Counterattack

Determined, Sampath convened his trusted team. He laid out a counter-strategy that would involve both transparency and proactive engagement with the public.

Sampath: “We need to control the narrative. We will hold a press conference and address everything head-on. No more hiding; let’s show them the truth.”

His team nodded, rallying behind his words. They drafted a plan to counter misinformation, focusing on clear communication and direct outreach to the citizens.

Chapter 19: The Press Conference

The day of the press conference arrived. Sampath stood before the media, his demeanor calm and collected.

Sampath: “I am here today to address the concerns that have been raised. I acknowledge the mistakes made, but I am committed to this state’s welfare and progress. I will not be silenced by malicious attacks on my character.”

As he spoke, the room filled with tension as reporters fired questions, but Sampath stayed firm, countering each with clarity and conviction.

Chapter 20: The People’s Response

In the days following the press conference, the public’s response was overwhelming. The people rallied behind Sampath, showing support and solidarity.

Social media flooded with positive messages, hashtags supporting his reforms began to trend, overshadowing the negative narratives propagated by the opposition.

#StandWithSampath became a symbol of public support for his initiatives and a testament to his character.

Chapter 21: New Alliances

Recognizing the power of public support, Sampath reached out to local influencers and community leaders, fostering new alliances that would further solidify his position.

Sampath: “Together, we can create a better Karnataka. Your voices matter, and I want to hear them.”

These alliances brought a new energy to his administration, helping to push through reforms and initiatives that had stalled previously.

Chapter 22: The Turning Tide

As the opposition floundered, Sampath initiated significant reforms, focusing on healthcare, education, and infrastructure. The tangible changes in the community began to shift public perception.

People started to see the benefits of his leadership, and the once-chaotic political landscape began to stabilize.

Chapter 23: The Final Showdown

However, the opposition was not ready to give up. As Sampath's popularity grew, so did their desperation.

They planned a final attack, attempting to leverage any scandal or misstep to undermine his credibility before the next elections.

Sampath: "We must remain vigilant. They will try everything to bring us down. But we will not falter."

Chapter 24: Victory or Defeat

The day of the election approached, and the tension was palpable. Sampath knew that his journey had only just begun, but he was ready to face whatever challenges lay ahead.

Sampath stood before his supporters, "This is not just about winning an election; this is about transforming Karnataka. Together, we will endure, we will thrive, and we will succeed!"

As the crowd cheered, Sampath felt a renewed sense of purpose. Whether victory or defeat awaited him, he was determined to lead with integrity and honesty, fighting for the people of Karnataka until the very end.
